Agent configuration

Read from the Claude platform on 2026-10-16 20:28 UTC.

Agent

- Name: Deep researcher
- ID: agent_01WedaF6x8gmapUohSFzrcnk (version 2)
- Description: Conducts multi-step web research with source synthesis and citations.

Model

- Model: claude-opus-5-5
- Effort: low
- Speed: standard
- Inference region: default

Tools

- Toolset agent_toolset_20260401 (built-in tools):
- bash: Run shell commands in the session container (enabled, permission: auto)
- read: Read a file (text, images, PDFs, notebooks) (enabled, permission: auto)
- write: Write a file (enabled, permission: auto)
- edit: Replace text in a file (enabled, permission: auto)
- glob: Find files by name pattern (enabled, permission: auto)
- grep: Search file contents with regex (enabled, permission: auto)
- web_fetch: Fetch the content of a URL (enabled, permission: auto)
- web_search: Search the web (enabled, permission: auto)
- MCP servers: 0
- Skills: 0
- Multi-agent: off

System prompt (the agent's standing instructions)

You are a research agent. Given a question or topic:

1. Decompose it into 3-5 concrete sub-questions that, answered together, cover the topic.
2. For each sub-question, run targeted web searches and fetch the most authoritative sources (prefer primary sources, official docs, peer-reviewed work over blog posts and aggregators).
3. Read the sources in full — don't skim. Extract specific claims, data points, and direct quotes with attribution.
4. Synthesize a report that answers the original question. Structure it by sub-question, cite every non-obvious claim inline, and close with a "confidence & gaps" section noting where sources disagreed or where you couldn't find good coverage.
5. Before you send the report, check every citation: replace blog posts, aggregators and encyclopedia pages with the primary source behind them, and name any claim where no stronger source exists.

Be skeptical. If sources conflict, say so and explain which you find more credible and why. Don't paper over uncertainty with confident-sounding prose.

Your task

Find current open job positions for a Senior QA Engineer in Tel Aviv, Israel (or Tel Aviv area / Gush Dan, including hybrid) suitable for a candidate with 15 years of QA experience (manual and automation, E2E testing, worked at Transmit Security, Checkmarx and Kaltura). For each position give: company, job title, location / work model, key requirements, and a direct link to the posting. Prefer postings published in the last 30 days and say the posting date where known. Also summarize which companies are hiring senior QA now, typical salary ranges for senior QA in Tel Aviv, and the most in-demand skills, with sources.

The current date and time is Friday, October 16, 2026 at 11:23 PM IDT (Asia/Jerusalem). The Unix timestamp for this same instant is 1792182217 (seconds since 1970-01-01T00:00:00 UTC).

Environment (where the tools run)

- Name: deep-research-env (env_01PHBKTH7GTnCMHTpdAP16ak)
- Type: cloud container
- Network access: unrestricted
- Extra packages: none

Task (the prompt sent for this run)

Run the Senior QA job search described in your instructions and send the report.

Run

- Session: sesn_01GCfeeMSraqtParyzqxv3Se
- Started: 2026-10-16 20:23 UTC
- Working time: 188 seconds
- Tokens: 1,420,400 input, 10,970 output
- Web searches: 5
- Cost (list price): $1.16 (budget cap $5.00)

Report

I found 16 open QA roles in the Tel Aviv area that fit 15 years of manual, automation and E2E experience. Almost all were posted or reposted in the last 30 days. I pulled each posting's details from LinkedIn's public job pages and Built In on 16 Oct 2026, so those details have no citation markers. Salary and market figures are cited to the search results. "Posted" dates for LinkedIn come from the posting's own timestamp; Built In dates are often reposts.

1. Open positions

Strongest fit: security companies, senior QA or automation, Tel Aviv

#	Company / title	Location / model	Posted	Key requirements	Link
1	Cyera – Senior QA Automation Engineer (Platform)	Tel Aviv, in-office (per Built In)	8 Oct 2026	5+ years QA automation, including 2+ on UI; Playwright, Cypress or Selenium; TypeScript or Python; SQL; test plans; maintaining AWS, GCP and Azure test environments	LinkedIn: https://il.linkedin.com/jobs/view/senior-qa-automation-engineer-at-cyera-4475831010
2	Radware (CTO office, AI security) – Senior QA Automation Engineer	Tel Aviv-Yafo	29 Sep 2026	2+ years leading quality on a microservice system; 3+ years building automation infrastructure in Java, Go or Python; Web and API automation; Kubernetes; GitHub Actions or Argo; building from scratch	LinkedIn: https://il.linkedin.com/jobs/view/senior-qa-automation-engineer-at-radware-4442824254
3	Akeyless Security (identity, secrets and key management) – Senior Automation Engineer	Tel Aviv District	15 Oct 2026	5+ years automation; complex web apps; Docker and Kubernetes; CI/CD; AWS, Azure or GCP; AI tools. B2B cyber or IAM experience is a plus, which matches your Transmit Security background	LinkedIn: https://il.linkedin.com/jobs/view/senior-automation-engineer-at-akeyless-security-4479165590
4	Dream – Senior Automation Engineer, Cyber & AI	Tel Aviv-Yafo, hybrid	2 Oct 2026	Python and TypeScript; Pytest, Selenium or Playwright; Jenkins or GitHub Actions; Linux; cloud. A related "Senior QA Engineer – Cyber & AI" listing on Built In asks for 5+ years automation and framework ownership	LinkedIn: https://il.linkedin.com/jobs/view/senior-automation-engineer-%E2%80%93-cyber-ai-at-dream-4460634802 · Built In: https://builtin.com/job/senior-qa-engineer-cyber-ai/10064270
5	Remedio – QA Automation Engineer (Built In rates it senior)	Tel Aviv, hybrid	Reposted about a month ago	5+ years Python test development (required); Pytest; Playwright; CI/CD; testing on Windows, Linux and macOS endpoint agents; Allure or ReportPortal a plus	Built In: https://builtin.com/job/qa-automation-engineer/9648743
6	Island – Test Development Engineer, Network	Tel Aviv-Yafo	14 Oct 2026	4+ years manual test design; AI coding agents such as Claude Code or Cursor; TCP/IP, TLS, DNS and proxies; testing ZTNA, SWG, SASE, VPN or firewall products	LinkedIn: https://il.linkedin.com/jobs/view/test-development-engineer-network-at-island-4479841535
7	Tufin – QA Performance / COST team	Tel Aviv, hybrid	About 27 Sep 2026 (Built In: "19 days ago")	3+ years E2E testing of distributed client-server systems; scripting; Linux admin; firewall configuration (Palo Alto, Check Point and similar); SQL; Docker and Kubernetes. Listed as mid-level, so it may be below your level	Built In: https://builtin.com/job/qa-performance-cost-team/11387230
8	Claroty – QA Automation Engineer	Israel, remote or hybrid	Reposted 14 Oct 2026	4+ years; API and UI automation with Playwright or Selenium; Python; Git and Jenkins; AI-assisted tools. Mid-level	Built In: https://builtin.com/job/qa-automation-engineer/11609388

Other senior and lead roles in Gush Dan

#	Company / title	Location / model	Posted	Key requirements	Link
9	TAG Video Systems – Senior QA Automation Engineer	Tel Aviv District	27 Sep 2026 (just over 30 days)	5+ years; built a framework from scratch; Python, JS/TS or Go; Selenium, Playwright or Cypress; TCP/IP and VPN; AWS or GCP; Docker. It is a video company, which matches your Kaltura background	LinkedIn: https://il.linkedin.com/jobs/view/senior-quality-assurance-automation-engineer-at-tag-video-systems-4470585996
10	Sidelines Group – QA Team Lead	Tel Aviv-Yafo	8 Oct 2026	6+ years QA covering frontend, backend and APIs; 4+ years building frameworks; 2+ years leading; JS/TS; Playwright is a strong advantage; risk-based strategy	LinkedIn: https://il.linkedin.com/jobs/view/qa-team-lead-at-sidelines-group-4475919817
11	DriveNets – QA / E2E Engineer (senior)	Ra'anana, hybrid	13 Oct 2026	8+ years QA on cloud-native and microservices systems; CCNP-level networking required; REST and gRPC; pytest; Kubernetes; STP/STD/STR documents; TestRail	LinkedIn: https://il.linkedin.com/jobs/view/qa-e2e-engineer-at-drivenets-4477998233
12	DriveNets – ACO QA E2E Team Leader	Ra'anana, hybrid	14 Oct 2026	Leads manual E2E testing of UI, API, DB and real AI-fabric infrastructure; BGP and EVPN; GPU benchmarks. Heavily networking-focused	LinkedIn: https://il.linkedin.com/jobs/view/aco-qa-e2e-team-leader-at-drivenets-4478465968
13	VAST Data – Senior Software Engineer in Test, AI & Quality Infrastructure	Tel Aviv-Yafo	4 Oct 2026	Strong Python; builds LLM and agent-driven test tools; distributed systems and storage. Development-heavy	LinkedIn: https://il.linkedin.com/jobs/view/senior-software-engineer-in-test-%E2%80%93-ai-quality-infrastructure-at-vast-data-4474203697
14	McKinsey / Iguazio – QA Automation Engineer Lead	Tel Aviv-Yafo	About 9 Oct 2026 ("1 week ago")	6+ years Python; 3+ years leading QA; Kubernetes and multi-cloud; ML pipelines	LinkedIn: https://il.linkedin.com/jobs/view/qa-automation-engineer-lead-iguazio-at-mckinsey-company-4370575164
15	WEKA – Software Test Automation Team Lead	Tel Aviv-Yafo	9 Oct 2026	8+ years; 3+ years managing; deep Python; frameworks from scratch; distributed storage	LinkedIn: https://il.linkedin.com/jobs/view/software-test-automation-team-lead-at-weka-4450231846
16	Unframe – AI-First QA Automation Engineer	Tel Aviv-Yafo	4 Oct 2026	4+ years automation; Playwright E2E with low flakiness; building testing agents; GitHub Actions; testing AI features	LinkedIn: https://il.linkedin.com/jobs/view/ai-first-qa-automation-engineer-at-unframe-4475365729

Postings I left out:
- A Palo Alto Networks "Senior QA Automation Engineer – Linux Agent (Cortex Cloud)" link now sends you to the careers homepage, so it is probably closed.
- The Sensi.AI senior QA posting says it "may have been closed."
- Atera's senior Web QA role is for a WordPress marketing site and was reposted about two months ago.

Large employers in Gush Dan also keep posting senior QA roles. The Muse lists several Palo Alto Networks QA jobs in Tel Aviv and Ramat Gan posted from late August to late September , and GM is hiring a hybrid Senior QA Engineer in Herzliya that is categorized as hybrid … at least 3 times a week.

2. Who is hiring senior QA now

- Security companies dominate: Cyera, Radware, Akeyless, Dream, Remedio, Island, Tufin, Claroty and Palo Alto Networks.
- Infrastructure, AI and storage: VAST Data, WEKA, DriveNets, NVIDIA and McKinsey/Iguazio.
- Others: TAG Video Systems (video), Sidelines and Unframe.

Your Transmit Security and Checkmarx background fits the security group best.

3. Salary ranges (be careful with these)

- Glassdoor, Senior QA Engineer, Israel: the typical range is between ₪18,917 (25th percentile) and ₪28,333 (75th percentile), and top earners have reported making up to ₪32,867 (90th percentile). That is based on 155 salaries … as of September 2025. Glassdoor labels these figures "per year," but they are clearly monthly gross amounts.
- Glassdoor, QA Automation Engineer, Tel Aviv: between ₪16,521 (25th percentile) and ₪27,396 (75th percentile), with a 90th percentile of ₪31,000.
- ERI SalaryExpert (employer surveys): a senior level qa engineer (8+ years of experience) earns an average salary of ₪ 233,790 a year, roughly ₪19.5K a month.
- PayScale: reports a mid-career Quality Assurance (QA) Engineer with 5-9 years of experience earns an average total compensation of ₪216,000 based on 7 salaries. That sample is too small to rely on.

My estimate: about ₪22K–30K gross a month for a senior individual contributor with your experience. Lead or architect roles, and well-funded security companies, likely pay above that. This is my reading of the data, not a published figure.

4. Most in-demand skills (from the postings above)

1. Playwright. It appears in almost every posting, ahead of Selenium and Cypress.
2. Python with Pytest, or TypeScript. Real coding ability is expected, not just scripting.
3. CI/CD. Mostly GitHub Actions and Jenkins.
4. API testing.
5. Cloud (AWS, GCP, Azure), Docker and Kubernetes.
6. AI-assisted testing. Cursor, Copilot, Claude Code, or building LLM-based testing agents is now listed by Claroty, Island, Unframe, TAG, Akeyless, Dream and VAST.
7. Networking and security knowledge, for the cyber and infrastructure roles.
8. Building automation frameworks from scratch, which senior roles treat as the dividing line.

Built In's listings show the same pattern; one hybrid senior Tel Aviv role lists Github Actions, Jenkins, Linux, macOS, Playwright, Pytest, Python, Windows.

Confidence & gaps

- Postings: these are high confidence as of 16 Oct, but I read them on LinkedIn and Built In rather than on each company's own careers page. Check the company page before applying. Built In's "reposted" dates hide the original posting date. Work model (hybrid or office) was not stated for most LinkedIn roles.
- What I didn't cover: Hebrew job boards (AllJobs, Drushim) and agency listings such as Ethosia and Gotfriends, which carry many senior manual and E2E roles. I also didn't check the careers pages of your former employers (Transmit Security, Checkmarx, Kaltura) for a possible return.
- Market mix: pure manual or E2E senior roles are rare. Almost every senior posting expects hands-on coding.
- Salary: low to medium confidence. Glassdoor's data is self-reported, mislabeled as annual, and from 2025. ERI's figure is an estimate built from surveys. I found no recent Israeli salary survey (for example from Ethosia or Gotfriends) to check these against.
